

How to create a MySQL base?

To create a database via the Manager:

1. Log into your Manager v3.
2. Then click on your domain on the left menu
3. In 'Access to sections', click on 'Hosting'
4. In 'SQL database', click on 'Manage SQL'
5. Then, click on 'new database'.

Once the page is displayed, enter the name of your base and click on 'Accept'

6. Next, you will get the following message: The operation has been carried out successfully!
The modification will be effective in few minutes..

All settings are sent by email.
