

New DNS Servers

Since February 2007

WARNING: Since February, OVh has installed new DNS servers. From that time on, for all new domain , the following DNS declarations are required.

Correct declarations DNS

- for web hosting, your domain should be pointed to:
 - * ns11.ovh.net
 - * dns11.ovh.net
- for domain only (without hosting service):
 - * ns11.ovh.net
 - * dns11.ovh.net
- for domain which is hosted on a dedicated server in OVH:
 - * nsXXX.ovh.net (your server)
 - * sdns1.ovh.net
 - + You may wish to see the manual for details:
<http://help.ovh.co.uk/InstallSecondaryDNS>
- for a domain that is hosted on Kimsufi:
 - * ksXXX.kimsufi.com (your server)
 - * ns.kimsufi.com
 - + You may wish to see the manual for details:
<http://help.ovh.co.uk/InstallSecondaryDNS>

Incorrect declaration

Here are examples of DNS declarations which are incorrect and will not function properly:

- with kimsufi server, do not declare:

* ksXXX.kimsufi.com * sdns1.ovh.net

but instead: * ksXXX.kimsufi.com * ns.kimsufi.com

- with ovh server, for a new domain, do not declare:

* nsXXX.ovh.net * ns11.ovh.net

but instead: * nsXXX.ovh.net * sdns1.ovh.net

- with a new domain, do not declare:

* dns11.ovh.net * ns11.ovh.net

but instead: * dns11.ovh.net * ns11.ovh.net
